

SUMICO Certified to meet ISO 9001

Lubrication Design Solutions

**From oils to greases to dry lubricants...
We have all the answers to your lubrication problems.**

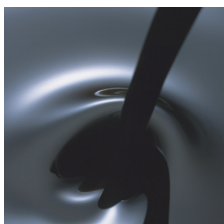

PASTES (Anti-Seizure Agents)

Paste formulated with base oil and a high concentration of a solid lubricant such as MoS₂ or fine metallic particle. By thinly coating the paste on friction surfaces of pins, screws, bolts and nuts, the teeth of gears, bearings, rotational or sliding parts of other equipment, it prevents seizure and scuffing during the engagement or the pressure fit of parts.

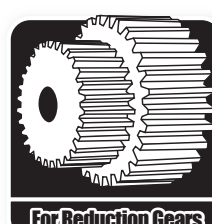

GREASES

Sumico Lubricant's grease products encompass a wide variety of products from grease used for general bearing and sliding part, to high performance products such as grease for heavy load machine use, and the grease for high temperatures used in ironworks. The range includes products formulated specifically for special uses such as precision instruments and food processing equipment.

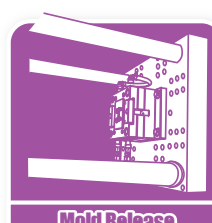

OILS

Sumico Lubricant's lubricating oil caters for lubrication under heavy conditions unable to be tackled by ordinary lubricants, by employing an additive formulated with a high concentration of MoS₂. Mainly for heavy load gear, and chains subject to high temperatures.

Maintenance For Molding Machines

In addition to release agents for plastic or rubber molding, and anti-rust agents and cleaning agents for molding dies, Sumico offers lubricants for ejector pins and greases for automatic lubrication of molding machines.

Oils / Greases / Lubrication Sprays

Food Machinery Lubricants

For Bearings

For Gears

For Chains

For Gliding/Sliding Surfaces

For locations associated with a risk of food, etc. being contaminated with a lubricant.

U-SAFE CLEAN

Plant derived
multipurpose detergent

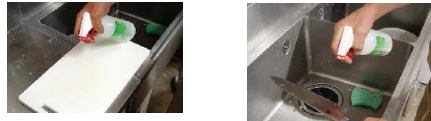

Using plant-based materials as palm, corn, soybean, safflower, sugar cane, apple, others.

characteristics

- 1. Possible eradication of typical food poisoning bacteria
(※ *Escherichia coli*, *Salmonella*)

- 2. Detergent performance will be keeping by oil separation with a good oil-water separability of U-SAFE CELAN.

E-CLEAN

benefits

- (1) improve economy
- (2) Activate microorganisms in oil-water separation facilities (water quality improvement)

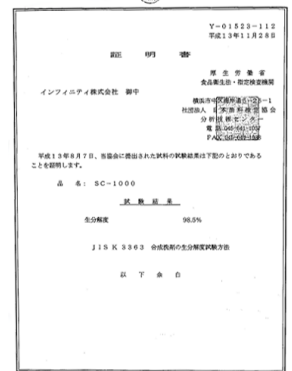

emulsion

* Label of export is not same as in Japan

examples

<p>carpet</p> <p>before</p> <p>after</p>	<p>degreasing</p> <p>before</p> <p>after</p>
<p>bath room</p> <p>Before</p> <p>after</p>	<p>ventilation fan, air cleaner</p> <p>before</p> <p>after</p>

Results of biodegradability test: 98.5%

level	dilution	Washing machine			
		heated / pressurize	heated / ultrasonic	heated / shower	higher temp. (※1)
light ~ medium	0.1% ~ 20%	1%	1 ~ 5%	negotiable	/
stubborn	50% ~ pure	5%	negotiable	negotiable
