Welding Bar Shrink Bundler

From 5 to 55 packs/minute

- Complete range from semi-auto with manual loading to fully automatic.
- Can be configured to match applications and layout: single lane, multilane, inline or side infeed, with horizontal or vertical collation.
- Tailored made solutions available on request for UHT bricks, tubes, tapered products and many more.

The most popular machines whether locally or internationally.

Overlap Shrink Bundler

From 25 to 135 packs/minute

- Fastest machine in the family and probably the most compact overlap seal machine available in the industry.
- One of the world's unique overlap bundlers using standard technology (no servo).
- Available for standard products as well as shaped bottles.

Compact, simple, clever design, reliable, fast and affordable: the true Autopack's spirit !

Cardboard Tray Packer

From 5 to 20 trays/minute

- Intermittent with side loading.
- Can be converted into full wrap around depending on application and speed.
- Trays are ideal for shelf-ready while full wrap around cardboard provides an alternative to recyclable plastic use.

Another perfect example for Autopack's compacity, simplicity and affordability !

Flexibility

- Plug and play installation
- Simple and tool free machine setting
- Adjustable for various product sizes and collation

Efficiency

- Designed to last
- Low cost operation and maintenance
- Extra compact machines for minimum floor space

Quality

- Stainless steel and excellent finishing
- Using components from premium suppliers
- UL/cUL and CE available

Affordability

- Lean and efficient manufacturing facility
- Large production volume giving competitive prices
- Best value for investment

PROFESSIONAL, REACTIVE AND SERVICE-MINDED TEAM WHO WILL SUPPORT ANYWHERE ANYTIME
