

# GROSS WEIGHT

## Gross Weight Packing Machine

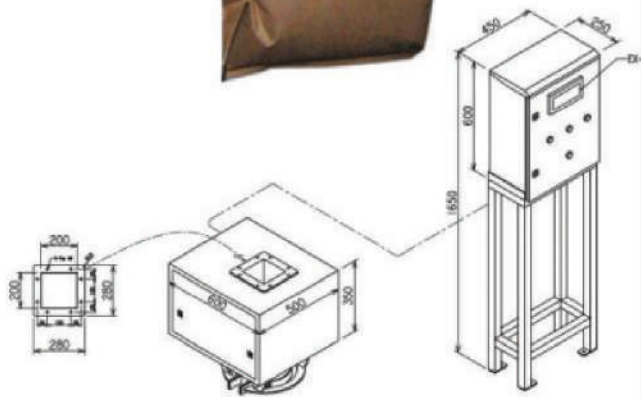

Suitable for packing: Fertilizer, Rice, Pet food, Etc.

### Features

- Packing size: 5-50 kg
- Speed: 300 bags/ hour (depend on products)
- Electronic screen controller
- Install and attach with storage barrel
- Main body: color sprayed steel; Product Approaching/ tank part: Stainless steel
  - o (Option: Stainless steel for all parts)
- Flow control with air cylinder (double acting type)
- Weighing by 2 load cells

### Additional equipment

- Data storage program, Printer, Sewing machine, Stand, Conveyor

# JUMBO BAG

## Jumbo Bag Packing Machine

Suitable for packing: Rice, Sugar, Tapioca flour, Plastics pellets, Resin pellets, Soda ash, Pet food, other seed/ grain like products

### Features

- Capacity: 500-2,000 kg
- Readability: 0.2 kg
- Accuracy: +/-0.5 to +/-1.5 kg
- Speed: 4-12 bags/ hour (Depend on products)
- Electronic screen controller
- Weighing by 4 load cells
- Main body: color sprayed steel
- Product Approaching/ tank part: Stainless steel 304
- Power source: 380 VAC 3 phase, electric power: 3.5 kW

### Additional equipment

- Out feed Conveyor, QC scale, Buzzer Alarm, Inventory Weighing System, etc.

\*\* Specification can be adjusted without notice in advance

\*\* Speed and Details of operation depend on field condition

# NET WEIGHT

## Two Head Net Weight Filling Machine

Suitable for weighing: Rice, Corn, Nut, Sugar, Plastic pellets, Fertilizer, Pet food and chemical material

### Features

- Capacity: 5-20 kg, Accuracy: +/- 15 grams
  - Capacity: 25-100 kg, Accuracy: +/- 30 to +/- 100 grams
  - Speed:
    - o Single head: 300-350 bags/ hour
    - o Double head: 600-840 bags/hour
- (Speed and Accuracy depend on field condition)
- Electronic screen controller, Indicator: 920i from America
  - Main body: color sprayed steel, Product Approaching/ tank part: Stainless steel
  - Flow control with air cylinder (double acting type)
  - 5-25 kg: Weighing by 2 load cells
  - 25-100 kg: Weighing by 3 load cells

### Additional equipment

- Data storage program, Printer, Sewing machine, Stand, Conveyor

# LIQUID FILLING

## Liquid Filling Machine

Suitable for packing liquid: Water, Oil, Herbicide, liquid chemicals

### Features

- Speed: 3-5 barrel per head per minute
- Control and display data by Indicator: 920i from America
- Manual barrel loading system with corrosion protection equipment
- Weighing by 1 load cell
- Synchronize with convey and storage system for packing, helping to decrease production damage
- Able to save data to computer and print weighing report
- Main body: Stainless steel 304
- Drain system included

- \*\* Specification can be adjusted without notice in advance
- \*\* Speed and Details of operation depend on field condition
